

3M™ Box Sealing Tapes

Box sealing tapes from 3M deliver convenience and dependability every time you use them. They're built tough, to resist score line breaking and center seam splitting even when boxes are handled roughly. Tape dispenses quickly and easily, to save you time.

Good

Tartan™ Box Sealing Tape 302

Specific application is for use in cold and damp environments such as refrigerated storage. It is a utility grade tape that has a conformable film backing and a consistent, pressure sensitive acrylic adhesive. This construction provides a good closure for lightweight boxes exposed to minimal distribution hazards.

Good

3M™ General Purpose Box Sealing Tape 369

General purpose box sealing tape with a hot melt rubber resin adhesive. This tape is designed specifically for utility type applications on light weight boxes.

Better

Tartan™ Box Sealing Tape 305

General purpose tape designed specifically to provide excellent closure on lightweight boxes where cold and damp conditions are prevalent. This tape has an acrylic based adhesive. This tape performs well over a broad temperature range.

3M™ Box Sealing Tapes

Product	Colour(s)	Tape Structure (Backing/Adhesive)	Total Thickness mm (mil)	Adhesion to Steel N/100mm (oz/in)	Tensile Strength at break N/100mm (lb/in)	Elongation at break (%)
302	Clear, Tan	Biaxially oriented polypropylene/pressure sensitive acrylic.	0.041 (1.6)	19.7 (18)	402 (23)	116
369	Clear	Biaxially oriented polypropylene film/pressure sensitive hot melt rubber-resin.	0.041 (1.6)	32 (30)	333 (19)	160
305	Clear	Biaxially oriented polypropylene film/pressure sensitive acrylic; requires no moisture, heat or solvent for activation.	0.046 (1.8)	n/a	368 (21)	n/a

Products highlighted above have been ranked in relation to each other (Good / Better / Best). Beyond the utility products featured in our EDLP price page, 3M has many tapes available for specialized or high performance requirements. Please contact your local 3M tape specialist.
