

Application Ideas

Product

Spray 72 Blue Spray Adhesive

Key Features

- Long open time
- Aggressive tack for fast assembly
- Low soak-in for long lasting bonds
- Precise spray control
- Blue colour
- Repositionable pressure sensitive
- Controlled variable width spray pattern

Application Ideas

- Bond carpet to wood
- Repair jute-backed carpet
- Polyethylene film bonding
- Polyethylene foam bonding
- Temporary positioning/holding fabric or paper
- Bond swimming pool liners above water
- Attach inner packaging in packages
- Seal polyethylene under concrete
- Pipe insulation lap adhesive

Spray 74 FoamFast Spray Adhesive

- Soft, non-dimpling glue line
- Reaches foam tearing strength
- Fast tack for fast assembly
- Non-misting, precise spray control
- Controlled variable width spray pattern

- General upholstery foam bonding
- Attach sound damping foam to metal
- Knife edge bonding for foam shapes
- Forming foam shapes by boxing
- Forming foam shapes by edge turning
- Bond fabrics to aircraft interiors, speakers, office partitions
- Core starting for mattress pad fabric
- Bonding smaller foam pieces together to save foam

ReMount Repositionable Spray Adhesive

- Permits material to be re-positioned
- Clear, smooth glue line with low soak-in
- Resists staining or wrinkling
- Quick and low tack
- No adhesive transfer when removed

- Art applications where re-positioning is needed such as layouts, keylines, package design, presentations and displays.
- Re-positionable and removable mounting of many sheet materials.

Spray 76 Hi-Tack Spray Adhesive

- Strong, one-surface bonds
- High temperature resistance
- Bonds to polyethylene and polypropylene
- Non-misting, precise spray control
- Controlled variable width spray pattern

- Attach nameplates
- Bond pipe insulation wrap
- Seal polybags
- Bond door fabric in vans
- Attach pool table fabric
- Attach fabric to pottery base

Super 77 Multipurpose Spray Adhesive

- High coverage
- Fast, aggressive tack
- Low soak-in for long lasting bonds
- Long bonding range
- Versatile – securely bonds most lightweight materials

- Variety of POP applications
- Bonds gaskets in water pumps
- Attach decorative foils and films
- Bond fabric to foam
- Fasten motor coil wrapper
- Attach grinding discs
- Attach fabric to bulletin boards
- Assemble easel-backed cards
- Attach insulation to sheet metal
- Attach wiring diagrams and labels
- Temporary bonding of scrim prior to fibreglass

Spray 78 Polystyrene Foam Insulation

- Does not attack expanded polystyrene foam
- 1 can equals 12 caulking tubes of mastic
- Fast drying
- Bonds expanded and extruded EPS
- Controlled variable width spray pattern
- High heat resistance

- Bond EPS bead board used in construction, insulation, crafts, floatation, packaging and impact resistance applications

Spray 80 Rubber & Vinyl Spray Adhesive

- Plasticizer-resistance
- High temperature resistance to 200°F
- Fast neoprene-based contact adhesive
- Durable-high strength adhesive
- Fast drying; fast bonding
- Low misting – precise spray control
- Primes concrete

- Bond all rubbers except EPDM
- Bond most supported vinyl and leather
- Bond rigid PVC to rigid PVC
- Adhere many plastics, laminates and wood products
- Attach rubber insulation to pipes
- Attach door gaskets
- Adhere stainless steel panels, stiffeners and metal kick plates
- Adhere rubber skids to flooring and stairs

Spray 90 Hi-Strength Spray Adhesive

- Bonds polypropylene and polyethylene
- High contact bond strength
- Fast drying time
- High temperature resistance
- Low misting - precise spray control
- Controlled variable width spray pattern
- Primes concrete for tape applications

- Bond decorative laminate
- Bond kick plates to desks
- Attach plastic sign lettering to wood
- Bond countertop edge banding
- Bond fabric to particle board
- Bond countertop edge banding
- Adhere polyethylene and polypropylene to metal or wood
